

# NIKHIL KORADA

nk4307@srmist.edu.in | 7995439837 | 2026

B.Tech, Computer Science and Engineering - Big Data Analytics

Address : Mini Matrix Apartment

bearing No.102 in the first floor Narasimman Nagar

## Summary

B. Tech Computer Science student with hands-on experience in building secure, scalable applications using Java, MERN, and SQL. Internship experience in fintech and research environments, collaborating with cross-functional teams to deliver performant, user-focused solutions. Skilled in troubleshooting, optimizing performance, and adhering to coding best practices.

## Education

### SRM IST-Kattankulathur

2026

B.Tech · Computer Science and Engineering - Big Data Analytics

CGPA - 9.28/10

### FIITJEE Junior college

2022

Class XII - Board of intermediate education Andhra Pradesh · MPC · Vijayawada, Andhra Pradesh

Percentage - 86.4%

### St. Joseph high school srikakulam

2020

Class X - Council for the Indian school certificate examinations · Srikakulam, Andhra Pradesh

Percentage - 83%

## Experience

### NIT Trichy

Aug 2025 - Present

Research Intern

- Collaborated with a project team to design and implement a machine learning model for obesity risk prediction during internship.
- Collected, cleaned, and analyzed health-related data to identify factors influencing obesity risk.
- Assisted in developing and testing predictive algorithms, focusing on improving model accuracy and reliability.

### Bluestock

Apr 2025 - May 2025

Intern

- Designed and developed dynamic, responsive user interface components using React.js to provide seamless and intuitive user experiences across multiple devices.
- Collaborated closely with backend teams to coordinate data flow and ensure the delivery of robust, scalable front-end solutions.
- Contributed to the smooth deployment and optimal performance of the overall system through effective teamwork and communication.

## Projects

### Doctor Appointment Booking System | [Github](#)

Mar 2025 - Apr 2025

Full Stack

- Built a full-stack doctor appointment platform with secure user authentication, role-based access, and real-time scheduling management.
- Implemented calendar-based booking with instant slot updates, cancellation handling, and automatic prevention of double-booking.
- Created responsive React UI and RESTful APIs for real-time appointment handling.
- Used MongoDB to store user data, appointments, and medical records efficiently.

### PlayWise Playlist Engine | [GitHub](#)

Aug 2025 - Aug 2025

Java

- Developed a modular playlist system using Linked Lists, Stacks, BSTs, and HashMaps.
- Implemented undo-redo functionality using the Command pattern and a stack.
- Built custom sort and constrained shuffle algorithms for playlist control.
- Optimized module interactions with synced rating, lookup, and playback features.

- Built a heart disease prediction system using ensemble models like Random Forest, XGBoost, and Voting Classifiers for improved accuracy and generalization.
- Optimized ensemble performance through targeted feature engineering and comparative model evaluation across multiple performance metrics.
- Created detailed performance reports and visualizations to present model insights clearly for stakeholders and medical practitioners.

- Built a full-stack movie success predictor using React, TypeScript, Node.js, and CSS.
- Designed a Node.js + Express backend to process inputs and return success rates.
- Created a responsive UI with dynamic forms and real-time prediction feedback.

## Certifications

---

Design and Analysis of Algorithms - NPTEL

DataBase Management System - NPTEL

Machine Learning - Coursera

## Competitions

---

Code Fest 25

Feb 2025

Layer Hackthon

Mar 2024

## Skills

---

**Programming Languages:** Java, C++, Javascript, SQL, HTML, CSS  
**Languages and Frameworks:** MongoDB, Express, Reactjs, Nodejs  
**Domain Knowledge:** Data Structures And Algorithms, OOPS, Machine learning , Database management system
