Projects

Doctor Appointment Booking System | [Github](#)

SRMIST · MERN

Mar 2025 – Apr 2025

Full Stack

- Built a full stack MERN application for booking and managing doctor appointments with secure JWT-based authentication.
- Created responsive React UI and RESTful APIs for real-time appointment handling.
- Used MongoDB to store user data, appointments, and medical records efficiently.

Water Quality Prediction | [Github](#)

SRMIST · Python

Aug 2024 – Nov 2024

Machine Learning

- Developed predictive models using machine learning to assess water quality.
- Conducted data analysis, reporting, and visualization for actionable insights.
- Demonstrated strong analytical and problem-solving skills in handling complex data.

Drug Price Calculator | [Github](#)

SRMIST · React

Dec 2024 – Feb 2025

Full Stack

- Developed a full-stack web application using JavaScript, HTML, and CSS to automate drug price calculations based on real-time data.
- Designed an intuitive user-friendly interface to enhance accessibility and usability.
- Showcased strong problem-solving skills, automation capabilities, and frontend-backend integration.
